**Complex Litigation and the Adversary System (University Casebook Series)** Jay Tidmarsh, Roger H. Transrud

A law school level coursebook on complex litigation and the adversary system. The book examines the four ways in which cases can be complex: joinder issues, pretrial issues, trial issues, and remedial issues. The book challenges the reader to consider whether the prevailing doctrines in these areas are consistent with modern adversarial theory, with the aspirations of our system of justice, and with a democratic system's constraints on judicial power. One volume.
