Star Atlas: Containing Maps of All the Stars from 1 to 6. 5 Magnitude Between the North Pole and 34 South Declination, and of All Nebulae and Star ... of Moderate Powers (Classic Reprint) Hermann Joseph Klein

Excerpt from Star Atlas: Containing Maps of All the Stars From 1 to 6. 5 Magnitude Between the North Pole and 34 South Declination, and of All Nebulae and Star Clusters in the Same Region Which Are Visible in Telescopes of Moderate Powers

This Edition of the star atlas has, as far as the text is concerned, been fully revised, and considerably enlarged. Not only are all the objects which are discussed brought into their correct positions for 1900, but the numbering of the nebulae in accordance with the new General Catalogue has been made an additional feature. Lastly, the number of described objects has been considerably increased, and the results of the most recent investigations and measurements have been fully kept in view. It is not, therefore, too much to say that this star atlas will commend itself to the many who are now interested in the study of the sublime heavens, as a trustworthy source of information, and as a guide conversant with the.

About the Publisher

Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at www.forgottenbooks.com

This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works."
