## **Unsupervised Classification: Similarity Measures, Classical and Metaheuristic Approaches, and Applications** Sanghamitra Bandyopadhyay, Sriparna Saha

Clustering is an important unsupervised classification technique where data points are grouped such that points that are similar in some sense belong to the same cluster. Cluster analysis is a complex problem as a variety of similarity and dissimilarity measures exist in the literature.

This is the first book focused on clustering with a particular emphasis on symmetry-based measures of similarity and metaheuristic approaches. The aim is to find a suitable grouping of the input data set so that some criteria are optimized, and using this the authors frame the clustering problem as an optimization one where the objectives to be optimized may represent different characteristics such as compactness, symmetrical compactness, separation between clusters, or connectivity within a cluster. They explain the techniques in detail and outline many detailed applications in data mining, remote sensing and brain imaging, gene expression data analysis, and face detection.

The book will be useful to graduate students and researchers in computer science, electrical engineering, system science, and information technology, both as a text and as a reference book. It will also be useful to researchers and practitioners in industry working on pattern recognition, data mining, soft computing, metaheuristics, bioinformatics, remote sensing, and brain imaging.

### **From reader reviews:**

#### **James Murray:**

Book is written, printed, or illustrated for everything. You can realize everything you want by a e-book. Book has a different type. As we know that book is important point to bring us around the world. Next to that you can your reading talent was fluently. A publication Unsupervised Classification: Similarity Measures, Classical and Metaheuristic Approaches, and Applications will make you to be smarter. You can feel considerably more confidence if you can know about anything. But some of you think this open or reading some sort of book make you bored. It is far from make you fun. Why they could be thought like that? Have you trying to find best book or suited book with you?

#### **Patricia Howland:**

Hey guys, do you wishes to finds a new book to see? May be the book with the title Unsupervised Classification: Similarity Measures, Classical and Metaheuristic Approaches, and Applications suitable to you? Often the book was written by popular writer in this era. The particular book untitled Unsupervised Classification: Similarity Measures, Classical and Metaheuristic Approaches, and Applications is the main one of several books which everyone read now. This kind of book was inspired lots of people in the world. When you read this reserve you will enter the new shape that you ever know before. The author explained their strategy in the simple way, and so all of people can easily to know the core of this e-book. This book will give you a large amount of information about this world now. In order to see the represented of the world in this book.

#### **Craig Palmer:**

Do you have something that you like such as book? The e-book lovers usually prefer to decide on book like comic, short story and the biggest the first is novel. Now, why not attempting Unsupervised Classification: Similarity Measures, Classical and Metaheuristic Approaches, and Applications that give your pleasure preference will be satisfied through reading this book. Reading behavior all over the world can be said as the method for people to know world much better then how they react toward the world. It can't be said constantly that reading habit only for the geeky individual but for all of you who wants to always be success person. So , for all of you who want to start reading through as your good habit, it is possible to pick Unsupervised Classification: Similarity Measures, Classical and Metaheuristic Approaches, and Applications become your current starter.

#### **Barry Altman:**

Guide is one of source of knowledge. We can add our expertise from it. Not only for students and also native or citizen need book to know the revise information of year to help year. As we know those ebooks have many advantages. Beside many of us add our knowledge, also can bring us to around the world. Through the book Unsupervised Classification: Similarity Measures, Classical and Metaheuristic Approaches, and

Applications we can consider more advantage. Don't that you be creative people? To be creative person must want to read a book. Just choose the best book that suitable with your aim. Don't always be doubt to change your life at this book Unsupervised Classification: Similarity Measures, Classical and Metaheuristic Approaches, and Applications. You can more inviting than now.
