Fatty Acid and Lipid Chemistry

F.D. Gunstone

Fatty Acid and Lipid Chemistry F.D. Gunstone

This book has pedigree. It has developed from experience over 50 years in reading, writing, thinking, and working with lipids and fatty acids. The study of lipids now involves many disciplines, all of which require a basic knowledge of the chemical nature and properties of these molecules. The book is written particularly for those who, with some knowledge of chemistry or biochemistry, need to know more about the nature of lipids and of fatty acids. It covers the materials they handle; their origin and chemical nature, the effects of processing, and their physical, chemical, biochemical, and nutritional properties. Another group of readers will be employed in the oleochemical industry modifying the material produced by nature for the benefit of human kind. They will have to understand the constraints of production and of chemistry within which they work and to be aware of the present state of knowledge about these materials. Yet another group may consider themselves to be academic researchers; however there is no escape from the real world of market place availability and they will need to know something about sourcing, about the changes which occur when oils and fat are refined and how these materials can be modified on a commercial scale.

From reader reviews:

Katie Doll:

The book Fatty Acid and Lipid Chemistry can give more knowledge and information about everything you want. Why then must we leave the great thing like a book Fatty Acid and Lipid Chemistry? A few of you have a different opinion about book. But one aim in which book can give many information for us. It is absolutely proper. Right now, try to closer with the book. Knowledge or information that you take for that, you can give for each other; you are able to share all of these. Book Fatty Acid and Lipid Chemistry has simple shape but you know: it has great and big function for you. You can appearance the enormous world by wide open and read a e-book. So it is very wonderful.

Mark Hoffman:

Are you kind of hectic person, only have 10 or 15 minute in your time to upgrading your mind skill or thinking skill perhaps analytical thinking? Then you are having problem with the book compared to can satisfy your short time to read it because all this time you only find publication that need more time to be examine. Fatty Acid and Lipid Chemistry can be your answer given it can be read by you actually who have those short spare time problems.

Marsha Bridges:

Is it you who having spare time then spend it whole day through watching television programs or just resting on the bed? Do you need something new? This Fatty Acid and Lipid Chemistry can be the response, oh how comes? A fresh book you know. You are thus out of date, spending your extra time by reading in this new era is common not a geek activity. So what these ebooks have than the others?

Teresa White:

As a university student exactly feel bored to reading. If their teacher inquired them to go to the library or even make summary for some reserve, they are complained. Just little students that has reading's soul or real their leisure activity. They just do what the teacher want, like asked to go to the library. They go to generally there but nothing reading significantly. Any students feel that examining is not important, boring and can't see colorful images on there. Yeah, it is to become complicated. Book is very important for yourself. As we know that on this era, many ways to get whatever we want. Likewise word says, ways to reach Chinese's country. So , this Fatty Acid and Lipid Chemistry can make you sense more interested to read.
