Aircraft and Rotorcraft System Identification (Aiaa Education Series)

Mark B. Tischler, Robert K. Remplr

Aircraft and Rotorcraft System Identification (Aiaa Education Series) Mark B. Tischler, Robert K. Remplr

Presenting proven methods, practical guidelines, and real-world flight-test results for a wide range of state-of-the-art flight vehicles, "Aircraft and Rotorcraft System Identification, Second Edition" addresses the entire process of aircraft and rotorcraft system identification from instrumentation and flight testing to model determination, validation, and application of the results. In this highly anticipated second edition, authors Tischler and Remple have added dedicated in-depth chapters presenting extended model structures and identification results for large flexible transport aircraft, and the detailed methodology to develop a continuous full flight envelope simulation model from individual system identification models and trim test data. Topics Discussed include: Frequency-response methods that are especially well suited for system identification of flight vehicle models from flight-test data; specific guidelines for flight testing, data analysis, and the proper selection of model structure complexity; and emphasis on the importance of physical insight in model development and applications. Special features: student version of CIPHER[registered] with updated graphical user interface using MATLAB[registered]; numerous flight-test results for both manned and unmanned vehicles illustrating the wide-ranging roles of system identification, including the analysis of flight mechanics, feedback control, handling qualities, subsystem dynamics, structural analysis, higher-order models for aircraft and rotorcraft, and simulation; and, extensive problem sets at the end of each chapter, with many exercises based on flight-test data provided for the XV-15 in hover and cruise giving the reader hands-on real-world experience with system identification methods and interpretation of the results.

From reader reviews:

Maribel Davenport:

With other case, little persons like to read book Aircraft and Rotorcraft System Identification (Aiaa Education Series). You can choose the best book if you love reading a book. Provided that we know about how is important a book Aircraft and Rotorcraft System Identification (Aiaa Education Series). You can add know-how and of course you can around the world by just a book. Absolutely right, mainly because from book you can learn everything! From your country till foreign or abroad you will find yourself known. About simple matter until wonderful thing you can know that. In this era, we can easily open a book as well as searching by internet product. It is called e-book. You may use it when you feel fed up to go to the library. Let's examine.

Ryan Pearson:

The book untitled Aircraft and Rotorcraft System Identification (Aiaa Education Series) contain a lot of information on the idea. The writer explains the girl idea with easy means. The language is very clear to see all the people, so do not really worry, you can easy to read that. The book was compiled by famous author. The author gives you in the new period of time of literary works. You can easily read this book because you can continue reading your smart phone, or gadget, so you can read the book with anywhere and anytime. If you want to buy the e-book, you can open their official web-site in addition to order it. Have a nice read.

Tony Valdez:

It is possible to spend your free time to learn this book this book. This Aircraft and Rotorcraft System Identification (Aiaa Education Series) is simple to develop you can read it in the playground, in the beach, train and also soon. If you did not have much space to bring the printed book, you can buy the actual e-book. It is make you simpler to read it. You can save often the book in your smart phone. So there are a lot of benefits that you will get when one buys this book.

Pamelia Thompson:

A lot of e-book has printed but it is unique. You can get it by web on social media. You can choose the most beneficial book for you, science, comedian, novel, or whatever by searching from it. It is referred to as of book Aircraft and Rotorcraft System Identification (Aiaa Education Series). You'll be able to your knowledge by it. Without making the printed book, it may add your knowledge and make you actually happier to read. It is most crucial that, you must aware about book. It can bring you from one place to other place.
