# The Material Point Method: A Continuum-Based Particle Method for Extreme Loading Cases (Tsinghua University Press Computational Mechanics Series)

Xiong Zhang, Zhen Chen, Yan Liu

**The Material Point Method: A Continuum-Based Particle Method for Extreme Loading Cases (Tsinghua University Press Computational Mechanics Series)** Xiong Zhang, Zhen Chen, Yan Liu

*The Material Point Method: A Continuum-Based Particle Method for Extreme Loading Cases* systematically introduces the theory, code design, and application of the material point method, covering subjects such as the spatial and temporal discretization of MPM, frequently-used strength models and equations of state of materials, contact algorithms in MPM, adaptive MPM, the hybrid/coupled material point finite element method, object-oriented programming of MPM, and the application of MPM in impact, explosion, and metal forming.

Recent progresses are also stated in this monograph, including improvement of efficiency, memory storage, coupling/combination with the finite element method, the contact algorithm, and their application to problems.

- Provides a user's guide and several numerical examples of the MPM3D-F90 code that can be downloaded from a website
- Presents models that describe different types of material behaviors, with a focus on extreme events.
- Includes applications of MPM and its extensions in extreme events, such as transient crack propagation, impact/penetration, blast, fluid-structure interaction, and biomechanical responses to extreme loading

**From reader reviews:**

**Johnnie Gonzales:**

Now a day people who Living in the era everywhere everything reachable by interact with the internet and the resources within it can be true or not need people to be aware of each data they get. How people have to be smart in having any information nowadays? Of course the correct answer is reading a book. Studying a book can help individuals out of this uncertainty Information especially this The Material Point Method: A Continuum-Based Particle Method for Extreme Loading Cases (Tsinghua University Press Computational Mechanics Series) book since this book offers you rich details and knowledge. Of course the data in this book hundred per-cent guarantees there is no doubt in it you probably know this.

**Carl Guerra:**

That book can make you to feel relax. This book The Material Point Method: A Continuum-Based Particle Method for Extreme Loading Cases (Tsinghua University Press Computational Mechanics Series) was vibrant and of course has pictures on the website. As we know that book The Material Point Method: A Continuum-Based Particle Method for Extreme Loading Cases (Tsinghua University Press Computational Mechanics Series) has many kinds or type. Start from kids until teens. For example Naruto or Private eye Conan you can read and think that you are the character on there. Therefore , not at all of book are usually make you bored, any it can make you feel happy, fun and relax. Try to choose the best book for you personally and try to like reading in which.

**Charles Shrader:**

A lot of reserve has printed but it differs from the others. You can get it by internet on social media. You can choose the most effective book for you, science, witty, novel, or whatever by searching from it. It is identified as of book The Material Point Method: A Continuum-Based Particle Method for Extreme Loading Cases (Tsinghua University Press Computational Mechanics Series). You can contribute your knowledge by it. Without departing the printed book, it can add your knowledge and make anyone happier to read. It is most important that, you must aware about guide. It can bring you from one location to other place.

**Allison Larson:**

E-book is one of source of information. We can add our information from it. Not only for students but also native or citizen have to have book to know the change information of year to year. As we know those books have many advantages. Beside we all add our knowledge, could also bring us to around the world. From the book The Material Point Method: A Continuum-Based Particle Method for Extreme Loading Cases (Tsinghua University Press Computational Mechanics Series) we can get more advantage. Don't you to be creative people? To get creative person must want to read a book. Merely choose the best book that acceptable with your aim. Don't end up being doubt to change your life at this book The Material Point

Method: A Continuum-Based Particle Method for Extreme Loading Cases (Tsinghua University Press Computational Mechanics Series). You can more appealing than now.
