Thin Film Solar Cells

K.L. Chopra, S.R. Das

Thin Film Solar Cells K.L. Chopra, S.R. Das

"You, O Sun, are the eye of the world You are the soul of all embodied beings You are the source of all creatures You are the discipline of all engaged in work" - Translated from Mahabharata 3rd Century BC
Today, energy is the lifeline and status symbol of "civilized" societies. All nations have therefore embarked upon Research and Development programs of varying magnitudes to explore and effectively utilize renewable sources of energy. Albeit a low-grade energy with large temporal and spatial variations, solar energy is abundant, cheap, clean, and renewable, and thus presents a very attractive alternative source. The direct conversion of solar energy to electricity (photovoltaic effect) via devices called solar cells has already become an established frontier area of science and technology. Born out of necessity for remote area applications, the first commercially manufactured solar cells - single-crystal silicon and thin film CdS/Cu₂S - were available well over 20 years ago. Indeed, all space vehicles today are powered by silicon solar cells. But large-scale terrestrial applications of solar cells still await major breakthroughs in terms of discovering new and radical concepts in solar cell device structures, utilizing relatively more abundant, cheap, and even exotic materials, and inventing simpler and less energy intensive fabrication processes. No doubt, this extraordinary challenge in R/D has led to a virtual explosion of activities in the field of photovoltaics in the last several years.

From reader reviews:

Gerald James:

Do you have favorite book? For those who have, what is your favorite's book? Book is very important thing for us to find out everything in the world. Each book has different aim or perhaps goal; it means that guide has different type. Some people feel enjoy to spend their time to read a book. These are reading whatever they consider because their hobby is actually reading a book. Think about the person who don't like reading a book? Sometime, individual feel need book once they found difficult problem or exercise. Well, probably you will need this Thin Film Solar Cells.

Dena Jacobs:

The guide with title Thin Film Solar Cells has a lot of information that you can discover it. You can get a lot of advantage after read this book. This book exist new information the information that exist in this guide represented the condition of the world right now. That is important to yo7u to learn how the improvement of the world. That book will bring you throughout new era of the globalization. You can read the e-book on your own smart phone, so you can read the item anywhere you want.

Donna Salerno:

Do you have something that you like such as book? The book lovers usually prefer to pick book like comic, quick story and the biggest the first is novel. Now, why not attempting Thin Film Solar Cells that give your pleasure preference will be satisfied by reading this book. Reading habit all over the world can be said as the method for people to know world a great deal better then how they react towards the world. It can't be claimed constantly that reading addiction only for the geeky person but for all of you who wants to be success person. So , for all of you who want to start reading through as your good habit, it is possible to pick Thin Film Solar Cells become your starter.

Jonathan Hickman:

Are you kind of busy person, only have 10 or even 15 minute in your day time to upgrading your mind ability or thinking skill possibly analytical thinking? Then you have problem with the book as compared to can satisfy your limited time to read it because this time you only find e-book that need more time to be read. Thin Film Solar Cells can be your answer given it can be read by you who have those short extra time problems.
