## **Wave Propagation in Electromagnetic Media (Springer Series in Perception) Julian L. Davis**

This is the second work of a set of two volumes on the phenomena of wave propagation in nonreacting and reacting media. The first, entitled *Wave Propagation in Solids and Fluids* (published by Springer-Verlag in 1988), deals with wave phenomena in nonreacting media (solids and fluids). This book is concerned with wave propagation in reacting media—specifically, in electromagnetic materials. Since these volumes were designed to be relatively self contained, we have taken the liberty of adapting some of the pertinent material, especially in the theory of hyperbolic partial differential equations (concerned with electromagnetic wave propagation), variational methods, and Hamilton-Jacobi theory, to the phenomena of electromagnetic waves. The purpose of this volume is similar to that of the first, except that here we are dealing with electromagnetic waves. We attempt to present a clear and systematic account of the mathematical methods of wave phenomena in electromagnetic materials that will be readily accessible to physicists and engineers. The emphasis is on developing the necessary mathematical techniques, and on showing how these methods of mathematical physics can be effective in unifying the physics of wave propagation in electromagnetic media. Chapter 1 presents the theory of time-varying electromagnetic fields, which involves a discussion of Faraday's laws, Maxwell's equations, and their applications to electromagnetic wave propagation under a variety of conditions.

### **From reader reviews:**

#### **Rodney Schmitt:**

Spent a free time for you to be fun activity to perform! A lot of people spent their sparetime with their family, or their friends. Usually they undertaking activity like watching television, planning to beach, or picnic inside park. They actually doing same task every week. Do you feel it? Would you like to something different to fill your personal free time/ holiday? May be reading a book might be option to fill your no cost time/ holiday. The first thing you will ask may be what kinds of guide that you should read. If you want to try look for book, may be the publication untitled Wave Propagation in Electromagnetic Media (Springer Series in Perception) can be great book to read. May be it is usually best activity to you.

#### **Clarence Riley:**

Do you really one of the book lovers? If yes, do you ever feeling doubt while you are in the book store? Make an effort to pick one book that you just dont know the inside because don't ascertain book by its deal with may doesn't work is difficult job because you are afraid that the inside maybe not while fantastic as in the outside search likes. Maybe you answer can be Wave Propagation in Electromagnetic Media (Springer Series in Perception) why because the fantastic cover that make you consider regarding the content will not disappoint a person. The inside or content is actually fantastic as the outside or even cover. Your reading sixth sense will directly show you to pick up this book.

#### **Charline Bynum:**

With this era which is the greater person or who has ability to do something more are more important than other. Do you want to become one among it? It is just simple solution to have that. What you need to do is just spending your time almost no but quite enough to get a look at some books. One of several books in the top list in your reading list is Wave Propagation in Electromagnetic Media (Springer Series in Perception). This book which is qualified as The Hungry Hills can get you closer in becoming precious person. By looking upwards and review this guide you can get many advantages.

#### **Mary Quinn:**

As a university student exactly feel bored to reading. If their teacher requested them to go to the library as well as to make summary for some e-book, they are complained. Just little students that has reading's internal or real their leisure activity. They just do what the educator want, like asked to go to the library. They go to right now there but nothing reading seriously. Any students feel that reading through is not important, boring and can't see colorful pics on there. Yeah, it is being complicated. Book is very important in your case. As we know that on this period, many ways to get whatever we want. Likewise word says, many ways to reach Chinese's country. Therefore , this Wave Propagation in Electromagnetic Media (Springer Series in Perception) can make you experience more interested to read.
