ISO TC 91

ISO 457:1983, Soaps -- Determination of chloride content -- Titrimetric method ISO TC 91

The determination is carried out by argentometric titration after decomposition of a test and separation of fatty acids by filtration. The method is applicable to soaps having a chloride content, expressed as sodium chloride, equal to or greater than 0,1 % (m/m). It cannot be applied to componded products. This title may contain less than 24 pages of technical content.
