Lanthanide Single Molecule Magnets

Jinkui Tang, Peng Zhang

Lanthanide Single Molecule Magnets Jinkui Tang, Peng Zhang

This book begins by providing basic information on single-molecule magnets (SMMs), covering the magnetism of lanthanide, the characterization and relaxation dynamics of SMMs and advanced means of studying lanthanide SMMs. It then systematically introduces lanthanide SMMs ranging from mononuclear and dinuclear to polynuclear complexes, classifying them and highlighting those SMMs with high barrier and blocking temperatures – an approach that provides some very valuable indicators for the structural features needed to optimize the contribution of an Ising type spin to a molecular magnet. The final chapter presents some of the newest developments in the lanthanide SMM field, such as the design of multifunctional and stimuli-responsive magnetic materials as well as the anchoring and organization of the SMMs on surfaces. In addition, the crystal structure and magnetic data are clearly presented with a wealth of illustrations in each chapter, helping newcomers and experts alike to better grasp ongoing trends and explore new directions.

Jinkui Tang is a professor at Changchun Institute of Applied Chemistry, Chinese Academy of Sciences.

Peng Zhang is currently pursuing his PhD at Changchun Institute of Applied Chemistry, Chinese Academy of Sciences, with a specific focus on the molecular magnetism of lanthanide compounds under the supervision of Prof. Jinkui Tang.

From reader reviews:

Kelly Watson:

Information is provisions for anyone to get better life, information today can get by anyone in everywhere. The information can be a knowledge or any news even a huge concern. What people must be consider while those information which is inside former life are challenging be find than now's taking seriously which one is appropriate to believe or which one the resource are convinced. If you obtain the unstable resource then you buy it as your main information we will see huge disadvantage for you. All of those possibilities will not happen in you if you take Lanthanide Single Molecule Magnets as your daily resource information.

Daniel Spencer:

Reading a publication can be one of a lot of activity that everyone in the world loves. Do you like reading book thus. There are a lot of reasons why people like it. First reading a e-book will give you a lot of new data. When you read a guide you will get new information simply because book is one of various ways to share the information or their idea. Second, studying a book will make anyone more imaginative. When you studying a book especially tale fantasy book the author will bring you to imagine the story how the figures do it anything. Third, you could share your knowledge to other folks. When you read this Lanthanide Single Molecule Magnets, you can tells your family, friends as well as soon about yours e-book. Your knowledge can inspire others, make them reading a reserve.

Erwin Fast:

Many people spending their time by playing outside together with friends, fun activity along with family or just watching TV all day long. You can have new activity to enjoy your whole day by examining a book. Ugh, do you consider reading a book will surely hard because you have to accept the book everywhere? It ok you can have the e-book, getting everywhere you want in your Smartphone. Like Lanthanide Single Molecule Magnets which is finding the e-book version. So , why not try out this book? Let's see.

Shirley Akins:

Don't be worry when you are afraid that this book will filled the space in your house, you might have it in e-book method, more simple and reachable. This particular Lanthanide Single Molecule Magnets can give you a lot of friends because by you looking at this one book you have matter that they don't and make you actually more like an interesting person. This book can be one of one step for you to get success. This book offer you information that perhaps your friend doesn't understand, by knowing more than additional make you to be great individuals. So , why hesitate? We should have Lanthanide Single Molecule Magnets.
