Group and Ring Theoretic Properties of Polycyclic Groups: 10 (Algebra and Applications) Bertram Wehrfritz

Polycyclic groups are built from cyclic groups in a specific way. They arise in many contexts within group theory itself but also more generally in algebra, for example in the theory of Noetherian rings. The first half of this book develops the standard group theoretic techniques for studying polycyclic groups and the basic properties of these groups. The second half then focuses specifically on the ring theoretic properties of polycyclic groups and their applications, often to purely group theoretic situations.

The book is intended to be a study manual for graduate students and researchers coming into contact with polycyclic groups, where the main lines of the subject can be learned from scratch. Thus it has been kept short and readable with a view that it can be read and worked through from cover to cover. At the end of each topic covered there is a description without proofs, but with full references, of further developments in the area. An extensive bibliography then concludes the book.

From reader reviews:

Ruth Brinkman:

This Group and Ring Theoretic Properties of Polycyclic Groups: 10 (Algebra and Applications) book is not really ordinary book, you have it then the world is in your hands. The benefit you obtain by reading this book will be information inside this reserve incredible fresh, you will get details which is getting deeper a person read a lot of information you will get. This kind of Group and Ring Theoretic Properties of Polycyclic Groups: 10 (Algebra and Applications) without we understand teach the one who studying it become critical in considering and analyzing. Don't be worry Group and Ring Theoretic Properties of Polycyclic Groups: 10 (Algebra and Applications) can bring whenever you are and not make your case space or bookshelves' become full because you can have it in your lovely laptop even mobile phone. This Group and Ring Theoretic Properties of Polycyclic Groups: 10 (Algebra and Applications) to (Algebra and Applications) having excellent arrangement in word and also layout, so you will not experience uninterested in reading.

Marvin Gamez:

The event that you get from Group and Ring Theoretic Properties of Polycyclic Groups: 10 (Algebra and Applications) will be the more deep you searching the information that hide inside the words the more you get enthusiastic about reading it. It doesn't mean that this book is hard to comprehend but Group and Ring Theoretic Properties of Polycyclic Groups: 10 (Algebra and Applications) giving you joy feeling of reading. The article author conveys their point in selected way that can be understood through anyone who read that because the author of this reserve is well-known enough. This specific book also makes your vocabulary increase well. That makes it easy to understand then can go to you, both in printed or e-book style are available. We suggest you for having this Group and Ring Theoretic Properties of Polycyclic Groups: 10 (Algebra and Applications) instantly.

Floyd Hatfield:

Information is provisions for anyone to get better life, information nowadays can get by anyone from everywhere. The information can be a know-how or any news even a problem. What people must be consider whenever those information which is inside former life are hard to be find than now is taking seriously which one works to believe or which one the particular resource are convinced. If you have the unstable resource then you obtain it as your main information there will be huge disadvantage for you. All those possibilities will not happen within you if you take Group and Ring Theoretic Properties of Polycyclic Groups: 10 (Algebra and Applications) as your daily resource information.

Susan Preuss:

Spent a free the perfect time to be fun activity to try and do! A lot of people spent their leisure time with their family, or their friends. Usually they undertaking activity like watching television, gonna beach, or picnic within the park. They actually doing same task every week. Do you feel it? Would you like to something
