## **Modelling and Control in Biomedical Systems 1997 (including Biological Systems) (IFAC Proceedings Volumes)**

This volume contains the 90 papers presented at the 3rd IFAC Symposium on Modelling and Control in Biomedical Systems held in Warwick, UK from 23-26 March 1997. Significant work in the field of biomedical systems analysis and design is taking place throughout the world and the opportunities for technological interchanges offered by symposia like this one are extremely valuable for the progress and stability of effort and vision in this important human-centred field.

The symposium was multi- and inter-disciplinary in nature with the choice of topics solicited covering the major systems' components and functions of complex physiology. The remit was also extended, on this occasion, beyond mammalian physiology to that of biological systems. Therefore, a special session was devoted to the modelling and control of botanical systems with the aim of providing an exchange of ideas with biomathematicians.
