23 European Symposium on Computer Aided Process Engineering: Total plant integrated optimization of sulfur recovery and steam generation for Claus processes ... (Computer Aided Chemical Engineering) Flavio Manenti, Davide Papasidero, Giulia Bozzano, Sauro Pierucci, Eliseo Ranzi, Guido Buzzi-Ferraris

Multiscale process modeling is very appealing methodology for process optimization since it highlights certain issues that remain unexplored with conventional methodologies and debottlenecks certain potentialities that remain unexploited in chemical plants. In this work, a kinetic model with 2400 reactions and 140 species is implemented in a proper reactor network to characterize the thermal furnace and the waste heat boiler of sulfur recovery units; the network with detailed kinetics is the kernel of a Claus process simulation that include all the unit operations and the catalytic train. By doing so, reliable estimation of acid gas conversion, elemental sulfur recovery, and steam generation is achieved with the possibility to carry out an integrated process-energy optimization at the total plant scale.

From reader reviews:

Mary Davis:

The actual book 23 European Symposium on Computer Aided Process Engineering: Total plant integrated optimization of sulfur recovery and steam generation for Claus processes ... (Computer Aided Chemical Engineering) has a lot of information on it. So when you read this book you can get a lot of profit. The book was written by the very famous author. This articles author makes some research previous to write this book. This kind of book very easy to read you can get the point easily after reading this book.

Ines Patterson:

Reading a book for being new life style in this season; every people loves to go through a book. When you read a book you can get a large amount of benefit. When you read guides, you can improve your knowledge, simply because book has a lot of information in it. The information that you will get depend on what kinds of book that you have read. In order to get information about your analysis, you can read education books, but if you act like you want to entertain yourself read a fiction books, such us novel, comics, along with soon. The 23 European Symposium on Computer Aided Process Engineering: Total plant integrated optimization of sulfur recovery and steam generation for Claus processes ... (Computer Aided Chemical Engineering) offer you a new experience in studying a book.

Jorge Wilson:

In this period of time globalization it is important to someone to obtain information. The information will make professionals understand the condition of the world. The health of the world makes the information easier to share. You can find a lot of references to get information example: internet, paper, book, and soon. You will observe that now, a lot of publisher that will print many kinds of book. Typically the book that recommended to you is 23 European Symposium on Computer Aided Process Engineering: Total plant integrated optimization of sulfur recovery and steam generation for Claus processes ... (Computer Aided Chemical Engineering) this guide consist a lot of the information with the condition of this world now. This particular book was represented just how can the world has grown up. The vocabulary styles that writer value to explain it is easy to understand. Often the writer made some investigation when he makes this book. This is why this book appropriate all of you.

Lisa Phelps:

Many people spending their time by playing outside along with friends, fun activity with family or just watching TV 24 hours a day. You can have new activity to pay your whole day by studying a book. Ugh, think reading a book can actually hard because you have to use the book everywhere? It ok you can have the e-book, bringing everywhere you want in your Mobile phone. Like 23 European Symposium on Computer

Aided Process Engineering: Total plant integrated optimization of sulfur recovery and steam generation for Claus processes ... (Computer Aided Chemical Engineering) which is finding the e-book version. So , why not try out this book? Let's find.
