Searching for Dark Matter with the ATLAS Detector (Springer Theses) Steven Schramm

This thesis describes the search for Dark Matter at the LHC in the mono-jet plus missing transverse momentum final state, using the full dataset recorded in 2012 by the ATLAS Experiment. It is the first time that the number of jets is not explicitly restricted to one or two, thus increasing the sensitivity to new signals. Instead, a balance between the most energetic jet and the missing transverse momentum is required, thus selecting mono-jet-like final states.

Collider searches for Dark Matter have typically used signal models employing effective field theories (EFTs), even when comparing to results from direct and indirect detection experiments, where the difference in energy scale renders many such comparisons invalid. The thesis features the first robust and comprehensive treatment of the validity of EFTs in collider searches, and provides a means by which the different classifications of Dark Matter experiments can be compared on a sound and fair basis.

From reader reviews:

Bobby Miller:

Hey guys, do you want to find a new book to learn? Maybe the book with the title Searching for Dark Matter with the ATLAS Detector (Springer Theses) suitable to you? The particular book was written by a well-known writer in this era. Typically the book titled Searching for Dark Matter with the ATLAS Detector (Springer Theses) is one of several books which everyone reads now. This kind of book has inspired a number of people in the world. When you read this book you will enter the new age that you have never known before. The author explained their thoughts in a simple way, thus all of us can easily be aware of the core of this publication. This book will give you a large amount of information about this world now. So that you can see the representation of the world with this book.

Kathy Vaughn:

People living in this new moment of lifestyle always aim to and must have their spare time or they will get a wide range of stress from both everyday life and work. So, once we ask do people have time, we will say absolutely yes. People are human, not really a robot. Then we question again, what kind of activity are there when spare time comes to an individual of course your answer may be unlimited. Then do you try this one, reading textbooks. It can be your alternative throughout spending your spare time, typically the book you have read is definitely Searching for Dark Matter with the ATLAS Detector (Springer Theses).

Diana Pearson:

Do you have something that suits you such as a book? The reserve lovers usually prefer to decide on books like comic, quick story and the biggest you are novel. Now, why not seek Searching for Dark Matter with the ATLAS Detector (Springer Theses) that give your satisfaction preference will be satisfied simply by reading this book. Reading behavior all over the world can be said as the opportunity for people to know the world considerably better than how they react towards the world. It can't be mentioned constantly that reading routine is only for the geeky person but for all of you who want to end up being a success person. So, for every you who want to start reading as your good habit, you can pick Searching for Dark Matter with the ATLAS Detector (Springer Theses) become your current starter.

Shirley Bishop:

Publication is one of the sources of understanding. We can add our information from it. Not only for students but additionally native or citizens want books to know the updated information of year in order to year. As we know those ebooks have many advantages. Besides most of us add our knowledge, can also bring us around the world. By book Searching for Dark Matter with the ATLAS Detector (Springer Theses) we can consider more advantage. Don't you to be creative people? To become a creative person must want to read a book. Just simply choose the best book that is suitable with your aim. Don't end up being doubtful to change your life by this book Searching for Dark Matter with the ATLAS Detector (Springer Theses). You can be more inviting than

now.
