## **The Charter School Landscape** Sandra Vergari

Charter schools are publicly funded entities that enjoy freedom from many of the regulations under which traditional public schools operate. There are, however, state and local variations in charter school legislation and implementation. *The Charter School Landscape* is the first book to analyze and compare charter school politics and policies across a broad range of jurisdictions.

The first charter school opened in Minnesota in 1992. Within nine years, there were more than 2,000 charter schools operating in thirty-four states, Washington, D.C., and Alberta, Canada. Public discourse on the charter school reform is often passionate and politically motivated. Sandra Vergari has assembled a group of experts to present a more reflective and scholarly discussion of the reform, its performance to date, and its implications for public policy.

Each chapter focuses on a single state or province, and systematically addresses such issues as charter school laws, the politics of policy implementation, charter school accountability, controversies and trends, and prospects for the future. In addition, the contributors emphasize significant issues specific to each state that offer lessons for analysts and policymakers everywhere. As a whole, *The Charter School Landscape* suggests that charter schools are having a significant impact on the institution of public education and how we think about the concept of the "real public school."
