The Colours of Infinity: The Beauty, The Power and the Sense of Fractals

Nigel Lesmoir-Gordon, Arthur C. Clarke

The Colours of Infinity: The Beauty, The Power and the Sense of Fractals Nigel Lesmoir-Gordon, Arthur C. Clarke

Benoit Mandelbrot discovered what is now called the M-Set in the early seventies and coined the term 'fractal' to describe the geometry behind it. The power and the beauty of fractals were only capable of being seen with the advent of computers, which become psychedelic windows on the infinite when using simple fractal equations.

In 1992 Nigel Lesmoir-Gordon made the TV documentary, The Colors of Infinity about the Mandelbrot Set and fractals, which has since been seen right round the world. Nigel's enthusiasm brought together a dream team of contributors for the film who all now contribute to the book tracking how fractals have developed since the film was made. Sir Arthur C Clarke presented the film and in the book gives a lucidly simple account of the mathematics of the M-Set. Benoit Mandelbrot, the Belgian mathematician explains how it began. Professor Michael Barnsley, the computer graphics researcher who developed fractal image compression technology, explains the applications of the breakthroughs. Professor Ian Stewart, author of Does God Play Dice? adds his insights into the beautifully simple equation that gives birth to fractals.

Two of the most interesting applications of fractal geometry, reflected by the two new contributors to the book, are to the Internet and to the Stock Market. Dr Gary Flake, Chief Technology Officer at Overture, the leading provider of commercial search on the Internet and just taken over by Yahoo for 1.6 billion dollars, discusses the profoundly fractal nature of the Web in his article: The Self-ish Web. Robert Prechter Jr is President of Elliott Wave International, Inc. and founder of the Socionomics Institute. His latest title is Socionomics: The Science of History and Social Prediction (2003). He writes about how fractals can help us understand the oscillations of stock markets.

In the back of the book is a DVD of the original documentary with soundtrack by David Gilmour of Pink Floyd PLUS a 30-minute fractal animation to the music of members of Quintessence.

From reader reviews:

Faye Wilson:

The book *The Colours of Infinity: The Beauty, The Power and the Sense of Fractals* can give more knowledge and information about everything you want. Why then must we leave a very important thing like a book *The Colours of Infinity: The Beauty, The Power and the Sense of Fractals*? A number of you have a different opinion about book. But one aim this book can give many details for us. It is absolutely suitable. Right now, try to closer together with your book. Knowledge or details that you take for that, you may give for each other; you may share all of these. Book *The Colours of Infinity: The Beauty, The Power and the Sense of Fractals* has simple shape nevertheless, you know: it has great and large function for you. You can look the enormous world by available and read a book. So it is very wonderful.

Caroline Petrie:

Nowadays reading books be a little more than want or need but also work as a life style. This reading addiction give you lot of advantages. The benefits you got of course the knowledge the actual information inside the book that will improve your knowledge and information. The details you get based on what kind of book you read, if you want have more knowledge just go with schooling books but if you want sense happy read one together with theme for entertaining for instance comic or novel. Typically the *The Colours of Infinity: The Beauty, The Power and the Sense of Fractals* is kind of guide which is giving the reader capricious experience.

Thomas Evans:

That book can make you to feel relax. This specific book *The Colours of Infinity: The Beauty, The Power and the Sense of Fractals* was vibrant and of course has pictures on there. As we know that book *The Colours of Infinity: The Beauty, The Power and the Sense of Fractals* has many kinds or genre. Start from kids until youngsters. For example *Naruto* or *Investigator Conan* you can read and believe that you are the character on there. So , not at all of book are usually make you bored, any it can make you feel happy, fun and chill out. Try to choose the best book in your case and try to like reading this.

Leah Humphries:

Book is one of source of understanding. We can add our information from it. Not only for students but in addition native or citizen will need book to know the upgrade information of year for you to year. As we know those textbooks have many advantages. Beside many of us add our knowledge, could also bring us to around the world. Through the book *The Colours of Infinity: The Beauty, The Power and the Sense of Fractals* we can have more advantage. Don't you to definitely be creative people? To be creative person must like to read a book. Just simply choose the best book that suited with your aim. Don't end up being doubt to change your life at this time book *The Colours of Infinity: The Beauty, The Power and the Sense of Fractals*. You can more desirable than now.
