## New Horizons in pro-p Groups (Progress in Mathematics)

A pro-p group is the inverse limit of some system of finite p-groups, that is, of groups of prime-power order where the prime - conventionally denoted  $p$  - is fixed. Thus from one point of view, to study a pro-p group is the same as studying an infinite family of finite groups; but a pro-p group is also a compact topological group, and the compactness works its usual magic to bring 'infinite' problems down to manageable proportions. The p-adic integers appeared about a century ago, but the systematic study of pro-p groups in general is a fairly recent development. Although much has been discovered, many avenues remain to be explored; the purpose of this book is to present a coherent account of the considerable achievements of the last several years, and to point the way forward. Thus our aim is both to stimulate research and to provide the comprehensive background on which that research must be based. The chapters cover a wide range. In order to ensure the most authoritative account, we have arranged for each chapter to be written by a leading contributor (or contributors) to the topic in question. Pro-p groups appear in several different, though sometimes overlapping, contexts.

### From reader reviews:

#### **Roger Dupre:**

With other case, little people like to read book New Horizons in pro-p Groups (Progress in Mathematics). You can choose the best book if you want reading a book. Provided that we know about how is important the book New Horizons in pro-p Groups (Progress in Mathematics). You can add knowledge and of course you can around the world by way of a book. Absolutely right, due to the fact from book you can recognize everything! From your country right up until foreign or abroad you will be known. About simple issue until wonderful thing you could know that. In this era, we are able to open a book as well as searching by internet product. It is called e-book. You need to use it when you feel bored stiff to go to the library. Let's go through.

#### **Donna Bauer:**

Reading a book tends to be new life style in this era globalization. With reading through you can get a lot of information that could give you benefit in your life. Having book everyone in this world can certainly share their idea. Books can also inspire a lot of people. Many author can inspire their particular reader with their story as well as their experience. Not only the storyline that share in the textbooks. But also they write about the knowledge about something that you need example of this. How to get the good score toefl, or how to teach your children, there are many kinds of book that exist now. The authors on this planet always try to improve their ability in writing, they also doing some investigation before they write to their book. One of them is this New Horizons in pro-p Groups (Progress in Mathematics).

#### **Edmond Pounds:**

Reading can called thoughts hangout, why? Because if you are reading a book especially book entitled New Horizons in pro-p Groups (Progress in Mathematics) your brain will drift away trough every dimension, wandering in every aspect that maybe unfamiliar for but surely will become your mind friends. Imaging each word written in a guide then become one type conclusion and explanation in which maybe you never get previous to. The New Horizons in pro-p Groups (Progress in Mathematics) giving you another experience more than blown away your head but also giving you useful data for your better life within this era. So now let us explain to you the relaxing pattern at this point is your body and mind will be pleased when you are finished reading it, like winning a game. Do you want to try this extraordinary wasting spare time activity?

#### **Michael Ogden:**

Are you kind of busy person, only have 10 or 15 minute in your time to upgrading your mind ability or thinking skill even analytical thinking? Then you are receiving problem with the book compared to can satisfy your short time to read it because pretty much everything time you only find reserve that need more time to be examine. New Horizons in pro-p Groups (Progress in Mathematics) can be your answer given it can be read by a person who have those short extra time problems.
