Our Secret Planet

Christian von Nidda

Our Secret Planet Christian von Nidda

Much of our planet we have not yet explored. We have a better understanding of the lunar surface than of our own oceans and scientists have little idea of what lies inside the Earth. Theoretical physicists now believe there exist hidden worlds within our physical dimension that we have also yet to discover. Drawing insights from a multitude of ancient scriptures, together with the findings of leading scientists, philosophers and theologians, Christian von Nidda sheds light on this unknown realm. 'Our Secret Planet' is the product of over a decade of intensive research, which takes the reader on an epic journey beyond the confines of conventional thinking and to places where fact truly is stranger than fiction. Here is an original, learned and lucid work that will appeal to academics of the genre and to anyone who longs for answers to the many mysteries of our little understood planet.
