**A Taxonomy for Texture Description and Identification (Springer Series in Perception Engineering)**
A. Ravishankar Rao
A central issue in computer vision is the problem of signal to symbol transformation. In the case of texture, which is an important visual cue, this problem has hitherto received very little attention. This book presents a solution to the signal to symbol transformation problem for texture. The symbolic de- scription scheme consists of a novel taxonomy for textures, and is based on appropriate mathematical models for different kinds of texture. The taxonomy classifies textures into the broad classes of disordered, strongly ordered, weakly ordered and compositional. Disordered textures are described by statistical mea- sures, strongly ordered textures by the placement of primitives, and weakly ordered textures by an orientation field. Compositional textures are created from these three classes of texture by using certain rules of composition. The unifying theme of this book is to provide standardized symbolic descriptions that serve as a descriptive vocabulary for textures. The algorithms developed in the book have been applied to a wide variety of textured images arising in semiconductor wafer inspection, flow visualization and lumber processing. The taxonomy for texture can serve as a scheme for the identification and description of surface flaws and defects occurring in a wide range of practical applications.

**From reader reviews:**

**Joyce Matchett:**

Nowadays reading books be a little more than want or need but also be a life style. This reading habit give you lot of advantages. Associate programs you got of course the knowledge the rest of the information inside the book this improve your knowledge and information. The details you get based on what kind of book you read, if you want attract knowledge just go with knowledge books but if you want really feel happy read one having theme for entertaining such as comic or novel. The particular A Taxonomy for Texture Description and Identification (Springer Series in Perception Engineering) is kind of e-book which is giving the reader unpredictable experience.

**Jimmie Houck:**

This A Taxonomy for Texture Description and Identification (Springer Series in Perception Engineering) are generally reliable for you who want to certainly be a successful person, why. The main reason of this A Taxonomy for Texture Description and Identification (Springer Series in Perception Engineering) can be among the great books you must have will be giving you more than just simple studying food but feed you actually with information that perhaps will shock your previous knowledge. This book is actually handy, you can bring it all over the place and whenever your conditions in e-book and printed ones. Beside that this A Taxonomy for Texture Description and Identification (Springer Series in Perception Engineering) giving you an enormous of experience like rich vocabulary, giving you trial of critical thinking that we realize it useful in your day pastime. So , let's have it and revel in reading.

**Arthur Fabry:**

The book untitled A Taxonomy for Texture Description and Identification (Springer Series in Perception Engineering) contain a lot of information on the idea. The writer explains the woman idea with easy means. The language is very straightforward all the people, so do not really worry, you can easy to read the idea. The book was compiled by famous author. The author will take you in the new era of literary works. You can read this book because you can continue reading your smart phone, or gadget, so you can read the book inside anywhere and anytime. In a situation you wish to purchase the e-book, you can wide open their official web-site and order it. Have a nice learn.

**Christina Almonte:**

Many people said that they feel uninterested when they reading a book. They are directly felt this when they get a half elements of the book. You can choose the actual book A Taxonomy for Texture Description and Identification (Springer Series in Perception Engineering) to make your personal reading is interesting. Your current skill of reading ability is developing when you such as reading. Try to choose very simple book to make you enjoy you just read it and mingle the opinion about book and reading especially. It is to be 1st opinion for you to like to open a book and read it. Beside that the reserve A Taxonomy for Texture

Description and Identification (Springer Series in Perception Engineering) can to be your brand-new friend when you're truly feel alone and confuse in doing what must you're doing of this time.
