Enterprise Risk Management Tools and Templates

Edward A Robertson

Enterprise Risk Management Tools and Templates Edward A Robertson

In this companion volume to the main text *Solving the Enterprise Risk Management Puzzle: Secrets to Successful Implementation* the author provides 17 tools and templates in full colour, 8.5" x 11" size.

Using a workbook format, the tools and templates follow the risk management process; each one is accompanied by a brief discussion of its application. The reader will be able to, for example, assess the preparedness of the organization for ERM; analyze its planning and governance regimes; prepare and conduct High Quality Risk Assessment; and develop risk tolerance in accordance with mission and values.

Extra items added since the original 2011 publication: a multi-criteria selection tool to use due diligence in making software or policy choices, and a template to develop an ERM maturity model.

Developed over years in both public and private sector organizations through experience with clients, the items represent optimum generic designs that can be adapted by the reader to suit the particular business and working culture.

"Very useful. Clear, concise, articulate. Edward brought a practical tool for use in my work world. Thank you! Thank you!"

"The true details of how to start this process."

~ Session participants,

How to Conduct High Quality Risk Assessment, BC Provincial Government
