Internetworking with TCP/IP Vol. III, Client-Server Programming and Applications--BSD Socket Version (2nd Edition) Comer / Stevens

Volume iii is a practical guide to designing application software for the internet environment. It is the first book that shows how to design applications using the client-server paradigm. It shows how to use the most important networking protocol, tcp/ip, complementing the invaluable information in volumes i & ii of the best-selling internetworking series. The concepts presented apply to all client server software not just tcp/ip.
