Image and Signal Processing for Networked eHealth Applications (Synthesis Lectures on Biomedical Engineering) Manolis Wallace, Ilias Maglogiannis, Kostas Karpouzis

E-health is closely related with networks and telecommunications when dealing with applications of collecting or transferring medical data from distant locations for performing remote medical collaborations and diagnosis. In this book we provide an overview of the fields of image and signal processing for networked and distributed e-health applications and their supporting technologies. The book is structured in 10 chapters, starting the discussion from the lower end, that of acquisition and processing of biosignals and medical images and ending in complex virtual reality systems and techniques providing more intuitive interaction in a networked medical environment. The book also discusses networked clinical decision support systems and corresponding medical standards, WWW-based applications, medical collaborative platforms, wireless networking, and the concepts of ambient intelligence and pervasive computing in electronic healthcare systems.

From reader reviews:

Lucille Wood:

Information is provisions for anyone to get better life, information currently can get by anyone at everywhere. The information can be a expertise or any news even restricted. What people must be consider when those information which is in the former life are difficult to be find than now's taking seriously which one is appropriate to believe or which one the particular resource are convinced. If you have the unstable resource then you buy it as your main information we will see huge disadvantage for you. All of those possibilities will not happen in you if you take Image and Signal Processing for Networked eHealth Applications (Synthesis Lectures on Biomedical Engineering) as the daily resource information.

Jacquelyn Lopez:

Are you kind of busy person, only have 10 or even 15 minute in your time to upgrading your mind skill or thinking skill possibly analytical thinking? Then you are receiving problem with the book as compared to can satisfy your limited time to read it because all this time you only find book that need more time to be learn. Image and Signal Processing for Networked eHealth Applications (Synthesis Lectures on Biomedical Engineering) can be your answer as it can be read by an individual who have those short time problems.

Ryan Calhoun:

This Image and Signal Processing for Networked eHealth Applications (Synthesis Lectures on Biomedical Engineering) is brand-new way for you who has fascination to look for some information as it relief your hunger associated with. Getting deeper you into it getting knowledge more you know or you who still having little digest in reading this Image and Signal Processing for Networked eHealth Applications (Synthesis Lectures on Biomedical Engineering) can be the light food to suit your needs because the information inside this specific book is easy to get by simply anyone. These books create itself in the form and that is reachable by anyone, yeah I mean in the e-book type. People who think that in guide form make them feel sleepy even dizzy this guide is the answer. So there is no in reading a publication especially this one. You can find actually looking for. It should be here for a person. So , don't miss the item! Just read this e-book sort for your better life as well as knowledge.

Arthur Daniel:

You may get this Image and Signal Processing for Networked eHealth Applications (Synthesis Lectures on Biomedical Engineering) by check out the bookstore or Mall. Only viewing or reviewing it can to be your solve difficulty if you get difficulties for your knowledge. Kinds of this guide are various. Not only by simply written or printed but can you enjoy this book by e-book. In the modern era including now, you just looking because of your mobile phone and searching what their problem. Right now, choose your ways to get more information about your publication. It is most important to arrange yourself to make your
