An Atlas of Fullerenes (Dover Books on Chemistry)

P. W. Fowler, D. E. Manolopoulos

An Atlas of Fullerenes (Dover Books on Chemistry) P. W. Fowler, D. E. Manolopoulos

An introduction to the current state of theory in a new and lively field, this volume offers both students and researchers a practical guide. It features a comprehensive set of pictures of fullerene structures and tabulates their properties. In addition, it lists a computer program that will extend the tables as needed.

Seven chapters of descriptive material precede over 200 pages of tables with corresponding diagrams and serve as a self-contained introduction. Topics include fullerene cages, electronic structure, steric strain, symmetry and spectroscopy, fullerene isomerization, and carbon gain and loss. Each chapter concludes with references and notes.
