**Malaria Control During Mass Population Movements and Natural Disasters** Program on Forced Migration and Health at the Mailman School of Public Health of Columbia University, National Research Council, Division of Behavioral and Social Sciences and Education, Committee on Population, Roundtable on the Demography of Forced Migration, Holly A. Williams, Peter B. Bloland

Admittedly, the world and the nature of forced migration have changed a great deal over the last two decades. The relevance of data accumulated during that time period can now be called into question. The roundtable and the Program on Forced Migration at the Mailman School of Public Health of Columbia University have commissioned a series of epidemiological reviews on priority public health problems for forced migrants that will update the state of knowledge. *Malaria Control During Mass Population Movements and Natural Disasters* -- the first in the series, provides a basic overview of the state of knowledge of epidemiology of malaria and public health interventions and practices for controlling the disease in situations involving forced migration and conflict.
