Round the Moon: A Sequel to From the Earth to the Moon

Jules Verne

Round the Moon: A Sequel to From the Earth to the Moon Jules Verne

Around the Moon (French: *Autour de la Lune*, 1870), Jules Verne's sequel to *From the Earth to the Moon*, is a science fiction novel continuing the trip to the moon which left the reader in suspense after the previous novel. It was later combined with *From the Earth to the Moon* to create *A Trip to the Moon and Around It*. Having been fired out of the giant Columbiad space gun, the Baltimore Gun Club's bullet-shaped projectile, along with its three passengers, Barbicane, Nicholl and Michel Ardan, begins the five-day trip to the moon. A few minutes into the journey, a small, bright asteroid passes within a few hundred yards of them, but luckily does not collide with the projectile. The asteroid had been captured by the Earth's gravity and had become a second moon.
