Changes in Flood Risk in Europe (IAHS Special Publications)

Z. W. Kundzewicz

Changes in Flood Risk in Europe (IAHS Special Publications) Z. W. Kundzewicz

Floods are the most prevalent natural hazard in Europe. But, has flood risk increased in the continent? How, where, and why? Are climate change impacts apparent? How do socio-economic trends and associated land-use change impact flood risk?

This interdisciplinary book, authored by an international team, offers:

A comprehensive overview of flood risk in Europe, past and present, and future

National/regional chapters covering Central Europe, Western Europe, Southern Europe and Northern Europe, the Alpine region and the Iberian Peninsula.

A focus on detection and attribution of change with respect to climate change and its impacts, water resources and flood risk, the re-insurers view point, and future projections of flood risk

Rectification of common-place judgements, e.g.: "climate is warming so floods should become more frequent and intense"; observations do not always confirm this expectation

The book will be of interest to those interested in floods and flood risk, including research scientists and educators, students, engineers, planners, risk reduction specialists, staff of specialized national and international agencies, and the media.

Foreword

Preface

1 Introduction

I FACETS OF CHANGE

2 Changes in Flood Risk - Setting the Stage

3 Catalogue of Large Floods in Europe in the 20th Century

4 Large-scale Flooding in Europe, 1961-2005

5 Changing Floods in Europe

6 Changes in Intense Precipitation in Europe

7 Historical Floods in Europe in the Past Millennium

II NATIONAL AND REGIONAL PERSPECTIVES ON FLOODS

8 Floods in Austria

9 Floods in the Czech Republic

10 Floods in France

11 Flood Risk from a Holistic Perspective - Observed Changes in Germany

12 Floods in Greece

13 Floods in Iceland

14 Flood Risk in Italy

15 Floods in The Netherlands

16 Floods in Norway

17 Floods in Poland

18 Floods in Switzerland

19 Flood Risk in the UK: Evidence of Change and Management Responses

20 Floods in the Alpine Areas of Europe

21 Floods in the Iberian Peninsula

III DETECTION AND ATTRIBUTION OF CHANGE, AND PROSPECTS

22 Detection of Changes

23 Detection and Attribution of Climate Change and Its Impacts

24 Detection and Attribution of Changes in Water Resources

25 Detection and Attribution of Changes in Flood Hazard and Risk

26 Changing Flood Risk - A Re-insurer's Viewpoint

27 Projections of Flood Risk in Europe

The International Association of Hydrological Sciences is the world's premier member-based organization promoting the study and practice of Hydrology. Our books are authored, edited and produced at the highest level of quality, with the most current and thorough research.

Our publications and our work advance the science and the professional practice of Hydrology in a variety of Science and Engineering fields around the world.

The areas that we publish in include:

- Ground water
- Surface water
- Snow and ice hydrology
- Drought and desertification
- Runoff modelling
- Watershed
- Remote sensing
- Water quality

- Water resources and management
- Ecohydrology/hydro-ecology
- Erosion and sediment
- Tracer hydrology
