Global Advances in Human Caring Literacy

This narrative-based work is the first to describe Human Caring Literacy from the perspective of caring scientists who "live the life" by incorporating the precepts of human caring into every aspect of their personal and professional lives. It demonstrates, for nursing students and experienced nurses in a variety of roles, the abundant ways in which Caring Science Theory powerfully informs the lives of frontline clinicians, nursing deans and faculty, APRNs, and administrators in the United States and globally.

The book goes beyond theory to illustrate how Caring Science is used every day in a variety of arenas and scenarios, ranging from the advancement of the discipline of nursing in South America to peacemaking in the Middle East. It describes the methods that help practitioners develop mindfulness, reflection, authentic presence, intentionality, and a caring consciousness in the service of providing authentic, heart-centered care for patients, their families, and societies.
