Nursing Research Using Case Studies: Qualitative Designs and Methods in Nursing

Nursing Research Using Case Studies: Qualitative Designs and Methods in Nursing

Once considered to be a lesser pedagogical method, the case study is now recognized as a powerful, in-depth tool for examining evidence-based practice as it relates to patient care, family dynamics, professional roles, and organizational systems. Here is a unique how-to guide to conducting research using case studies.

Focusing on current leading methodologies, the text describes the philosophical basis and state of the art for using this qualitative method. The peer-reviewed designs (including interviews, physiological measurements, psychological tests, and analyses of patients' diaries and journals) are accompanied by an in-depth research plan, a discussion of appropriate methods, and ethical considerations. The text provides clear directives - bolstered by nursing examples - on how to solve practical problems a researcher may encounter.

Examples from international scholars who have published research using case studies are included along with coaching designed to support the new researcher in making decisions and facing challenges. The text is the eighth in a series of concise volumes addressing a variety of methods for conducting qualitative research. Conceived and edited by a noted expert in qualitative research, the book is designed for both novice and practicing researchers seeking to develop or expand their competency, health institution research divisions, in-service educators and students, and graduate nursing educators and students.

Key Features:

- Explains clearly and concisely how to conduct research using case studies
- Reviews the philosophical basis for using case studies
- Focuses on solving practical problems related to conducting research
- Offers rich nursing exemplars and coaching from international health/mental health contributors

The price is not too expensive but this book provides high quality.

John Montes:

As a student exactly feel bored for you to reading. If their teacher inquired them to go to the library as well as to make summary for some e-book, they are complained. Just minor students that has reading's internal or real their hobby. They just do what the educator want, like asked to go to the library. They go to presently there but nothing reading very seriously. Any students feel that reading is not important, boring and also can't see colorful images on there. Yeah, it is for being complicated. Book is very important for you. As we know that on this era, many ways to get whatever we wish. Likewise word says, many ways to reach Chinese's country. Therefore this Nursing Research Using Case Studies: Qualitative Designs and Methods in Nursing can make you experience more interested to read.

Wilda Baeza:

What is your hobby? Have you heard in which question when you got learners? We believe that that question was given by teacher for their students. Many kinds of hobby, Everybody has different hobby. And you also know that little person similar to reading or as studying become their hobby. You should know that reading is very important along with book as to be the point. Book is important thing to include you knowledge, except your own teacher or lecturer. You discover good news or update regarding something by book. A

substantial number of sorts of books that can you take to be your object. One of them are these claims
